FOR IMMEDIATE RELEASE: 9/05/23

Delkor Systems Inc. At Pack Expo 2023

ST. PAUL, MN: Join Delkor's reception in booth 3840C during Pack Expo Monday and Tuesday at 3 o'clock to celebrate their 50th anniversary and on achieving a major milestone for the Delkor Cabrio Case® shelf ready package!

This year Delkor customers will produce 1 billion Cabrio Cases across North America. Adopted by Walmart and other major retailers in 2016, Delkor's Cabrio Case has achieved immense popularity across many retail categories. The Cabrio Case's exponential growth is driven from its low-cost design, streamlined production, and its easy to open feature that guarantees zero instances of torn corrugated facing on the shelf. The patented design of the Cabrio Case comes free to use when produced on Delkor equipment.

Join the crowd every hour, on the hour, during Pack Expo for Delkor's live in-booth changeover events. Delkor's popular LSP series robotic case packer will be loading Haribo's gummy bear pouches into Delkor's Cabrio Case throughout the show. The sub-three-minute changeover is made possible with Delkor's recently patented Case Forming Technology. The changeover event features Delkor's robotic case packing system converting between a brown box shipper, a shelf ready Cabrio Case, and a large format club store stackable tray.

About Delkor Systems Inc.: [Delkor Systems, Inc.](https://www.delkorsystems.com) is a leading U.S. manufacturer of advanced robotic cartoning, case packing, and palletizing systems for producers both large and small across many industries. Delkor operates from a modern 300,000 square foot campus in St. Paul, MN. Their team of 350 employees was recently awarded the Rockwell Automation OEM Partner of the year.
