Delkor Systems Inc. At Process Expo 2023

ST. PAUL, MN: Join Delkor’s reception in booth #5037 during Process Expo Monday at 3 o’clock to celebrate their 50th anniversary and on achieving a major milestone for the Delkor Cabrio Case® shelf ready package!

This year Delkor customers will produce 1 billion Cabrio Cases across North America. Adopted by Walmart and other major retailers in 2016, Delkor's Cabrio Case has achieved immense popularity across many retail categories. The Cabrio Case’s exponential growth is driven from its low-cost design, streamlined production, and its easy to open feature that guarantees zero instances of torn corrugated facing on the shelf. The patented design of the Cabrio Case comes free to use when produced on Delkor equipment.

John Soules Foods in Delkor's Cabrio Case®

LSP Series Robotic Case Packer

Join the crowd every hour, on the hour, during Process Expo for Delkor’s live in-booth changeover events. Delkor’s popular LSP series robotic case packer will be loading John Soules Foods chicken fajita pouches into Delkor’s Cabrio Case throughout the show. The sub-three minute changeover is demonstrated with Delkor’s robotic case packing system converting between a brown box shipper, a shelf ready Cabrio case, and a large format club store stackable tray.

NEW! Delkor’s Sanitary Design Case Packing Equipment. From case forming through loading and sealing, this new line of equipment features open-channel stainless steel frames, NEMA 4X/IP69K enclosures (and more!) that enables the installation of full case packing systems within heavy washdown zones.

About Delkor Systems Inc.: Delkor Systems, Inc. is a leading U.S. manufacturer of advanced robotic cartoning, case packing, and palletizing systems for producers both large and small across many industries. Delkor operates from a modern 300,000 square foot campus in St. Paul, MN. Their team of 350 employees was recently awarded the Rockwell Automation OEM Partner of the year.
